Grand Theft Auto Vice City

**Barney Zoeller takes you on
a hectic 48-hour tour of the
greatest city on Earth**

IF YOU NEVER PLAYED GTA3

There are a few basic hints that will make playing this game far easier. Firstly, you should save often. Although you may not save during a mission, it is essential to save after successfully completing each one. Saving also re-fills your health. Constant saving will allow you to re-load whenever you get wasted or fail a mission.

When you die you will lose all of your weapons and have to pay hospital fees so avoid this pain by re-loading. You should also re-load if you get busted otherwise you will lose your weapons and have to pay a bribe. Even if you had nothing to lose each time you are wasted, busted or fail a mission, it is recorded on your Stat sheet, making you look like a loser.

Avoid the temptation to drive too fast. If you're going too fast you are likely to crash. Crashing five times en route to somewhere will mean the journey takes longer than if you just drove there at a sensible speed. Also, if you drive carefully you will not have to constantly exchange cars.

Finally, constant saving is good for your bank balance and armoury.

HOOKERS

Picking up prostitutes works in the same way as in GTA3. First, you will need at least \$5000. You will also need to be driving a decent car such as a Sentinel. Once you have these ingredients, start curb crawling.

The easiest place to find hookers is around the Ocean View Hotel. They tend to be wearing skimpy outfits. When you see one, park your car nearby. Provided there are no cops around she should approach your car and look in the window. If all goes well she will get in (the fool).

Now drive to a secluded spot (near the lighthouse, for example) and park the car. If there's no one around, the girl will give you a service — you'll know this is happening when the car bobs up and down, your health gets higher and your money goes down! Hookers aren't in the game just for fun; using them is the only way to get your health above 100. When they're through they will get out of the car. If you are a proper nasty piece of work you can get your money back by killing them.

MISSIONS

K. ROSENBERG & CO.

The lawyer is your first port of call in Vice City. He can be found in an office in the Washington Beach area.

1. THE PARTY

Follow the T-shirt icon to your change clothes then follow the pink blip to the Colonel Cortez's Yacht. After the scene take the girl to the Pole Position Club. Reward \$100.

2. BACK ALLEY BRAWL

Follow the blip to the club. Talk to Kent Paul then get a car and find the chef (yellow blip). Beat him up and grab his phone. As soon as the scene ends shoot the chefs then sprint down the alley to get a star. Your friend will be in an Inferno on the beach road to the right. Drive to the gun shop marked on the radar then return to the Ocean View Hotel. Reward \$200.

When you finish this mission a phone will start ringing, indicating that your cell phone is active. Press L1 to answer it. After a few calls a phone symbol will appear on the radar, allowing you to start doing missions for an anonymous caller.

3. JURY FURY

Pick up the Hammer. Go to the Yellow blip towards the north of the island and use the Hammer to smash up the indicated car until a cutscene plays. Go down to the other blip and hit the indicated man. After the cutscene use the hammer to smash up his car until he gets out. Reward \$400.

4. RIOT

Get some new clothes from Rafael's then head towards the radar blip. You need to start fighting with four different workers to provoke a riot. You should concentrate on one at a time to avoid getting mobbed. When you pick a fight do not hit another worker until your target is sprawled on the floor.

After four fights the gates will open. Go inside and kill any security guards that shoot you. Park all three vans close to each other while leaving a view to the red

barrel. Target the barrel and blow it up. If any of the vans survive the explosion just keep filling them with bullets until they catch fire and explode. Reward \$1000. You can now take jobs from Avery Carrington (marked with an A on the radar). You should also receive a phone call from Cortez, unlocking his missions.

COLONEL CORTEZ

You might get a chance with his daughter later but until then you will need to do jobs for the Colonel while he relaxes on his yacht.

5. TREACHEROUS SWINE

You get a chainsaw for this mission. Go to the blip and once inside chase after the target. Follow him out and run after him (having the chainsaw equipped slows you down). Kill him with the saw then get into the first vehicle you see. Drive to the spray shop to complete the mission. Reward \$250.

6. MALL SHOOTOUT

Head to the Washington Mall and park a vehicle by the north exit. Use the escalators to reach the middle level where you will see the courier. After the cutscene jump off the balcony to avoid the French. When he gets outside use the car you parked earlier to chase him on his motorbike. The easiest way to dispose of him is by ramming from behind to knock him off the bike and then run him over. Pick up the merchandise from his corpse then head down to the spray shop to get rid of your wanted level before returning to Cortez. Reward \$500.

7. GUARDIAN ANGELS

Follow the blip to the multistorey car park and get the gun. Lance will show up. Climb into a car and drive to the next waypoint. Get out of the car.

After the cutscene stand on the mark upstairs. Watch the deal. Aim at one of the Colombians and shoot both of them as soon as they start moving. After this concentrate your bullets on the second car that appears. When it blows finish off the gangsters coming from the van to the right before running down stairs to take on the Colombians coming from the south. If you see lots of guys around a vehicle shoot it until it blows up.

After all the Colombians are dead get an Uzi off the floor and then climb on the marked motorbike. Chase the other bike down the alleys. Get behind the bike and use a light machine gun to kill its rider. Take the case back to Diaz. Reward \$1000.

Shortly after completing this mission Diaz will call you, giving you access to his missions.

8. SIR. YES SIR!

This mission will not be available until after you beat Phnom Penh 86. Cross the main bridge to Vice Port and head north. Along the way you will see a military convoy with a tank in the middle. Pull up in front of the tank and hijack the tank as if it were a car. As the tank is nearly indestructible you do not need to worry about the kamikaze police that keep crashing into you. The only way they will get you is if you go too slow. As soon as you get in the tank you will have limited time to reach the next blip on your radar. Luckily it's not too far away. Follow the blip and drive into the marker then park the tank in the garage and get out. Reward \$2000.

9. ALL HANDS ON DECK

This mission becomes available shortly after beating the Death Row mission. It would also be wise to grab a rocket launcher (see map).

The mission takes place on Cortez's yacht. The first part involves men attacking from other boats. The easiest way to get through this is by blowing up the boats. Use your most powerful machine gun; any ammo you expend will be replaced. Afterwards the boat will be trapped. Run to the front and use your heaviest machine gun to blow up as many boats blocking the way as possible.

When you hear a helicopter look to the right and fill it with bullets until it blows. Repeat this for any more choppers that come your way. In between destroying boats and choppers suited Frenchmen will board the boat. Take them out first then start concentrating on any remaining vehicles.

After destroying most of the boats and choppers a cutscene will introduce an Apache-type attack helicopter. If you picked up a rocket launcher, shoot it down - if not, use your heaviest machine gun. To avoid getting shot to pieces wait for the Apache to make a pass and shoot it when it is facing away. After it plunges into the sea the mission will end. \$5000 and a boat.

EVERY CARRINGTON

10. FOUR IRON

Follow the blip to Jock Sports and get some new clothes. Once disguised in tartan, head to the nearby golf club. You cannot take guns inside but to the right just after the entrance is a club.

Take the club and climb into the nearby caddy car. Cross the bridge and veer left until you reach a group of caddy cars and golfers. Find the target and beat him up. If he gets in a caddy car, chase after him. Reward \$500.

11. DEMOLITION MAN

Go round the corner and climb into the marked van. After a brief tutorial you will be controlling an RC helicopter. Pick up bomb nearest to you and fly it to the building site.

The first target is on the ground to the left. To find the second one go up the stairs and drop the bomb to the right around the corner.

The third target is on the next floor up. You should fly your helicopter into any security guards with guns (this kills them, stopping them from shooting you down). Place the bomb in the marker to the right. You'll find the remaining target on the top floor. After planting the bomb the building will blow. Reward \$1000.

12. TWO BIT HIT

Head over to Little Havana and get some Cuban clothes from Little Havana Street Wear. Find a decent car and head up to the funeral. Go in and get spotted, then kill a few gangsters.

A marked car will drive off. Give chase. Start ramming the car but do not approach from behind as it drops explosive coffins. You need to keep ramming the car until it blows or stops. Try to force it off the road into an enclosed area then pull the driver out and kill him. Reward \$2000. You will receive a call shortly after this, unlocking the Cuban missions.

RICARDO DIAZ

Diaz can be found in the Coke Barons Mansion on Starfish Island

13. THE CHASE

Take one of the flashy cars by the front of the mansion and head towards the radar blip. When you reach the apartment look through the window then chase the man over the roof. If you catch fire, just keep going until the next cutscene. After jumping off the roof you will have to get on a bike and follow the villain in his jeep. Stay close behind but be sure to swerve around to avoid being shot. You do not need to be going very fast to keep up so take the corners slowly and watch out for the bumps in the road. Just keep up until you reach Prawn Island. Reward \$1000.

14. PHNOM PENH 86

This is probably the first time you've been in a helicopter in GTA. Lance will fly you to Prawn Island and circle the mansion. You should start off by shooting the barrels on the roof before finishing off any stray gangsters who avoid the explosion. The trick to beating this mission is to move the analog controller very slowly towards your targets. After clearing the roof the helicopter will give you a view of the balcony. Finish the gangster here and you will be taken to some tennis courts. You should target the vehicles first then the barrels before going for any individuals.

Eventually you will end up back at the main building where you can kill the guy from the last mission. When they're all dead Lance will land the helicopter. Walk over to the main entrance and go inside. Kill the first group of gangsters with the gun from the chopper. Afterwards you might find it easier using the auto target of one of the light machine guns.

Make your way to the roof and pick up the brief

case. Reward \$2000. Beating this mission will unlock the second island, boats and more missions from Cortez and Avery.

15. THE FASTEST BOAT

Head to the docks in Vice Port. Approach the boat marker with care, as it is heavily guarded. Walk in from the outer gate. Use a sub machine gun to target and kill any thugs nearby. Walk up the dock slowly and check round the corners. When you get to the dock a cutscene informs you to find a switch. The switch is in the nearest warehouse. After the boat is in the water shoot a few more baddies then run down the pier and steal the boat. Police boats will start firing at you but remember the boat is the fastest so just go full speed

back to the mansion. Reward \$4000.

16. SUPPLY & DEMAND

Get in the boat at the back of Diaz's mansion. You will be joined by Lance. From the start go straight and into the body of water separating the two main islands. You should just be able to see the competition. After going under the first bridge stay to the right and get ready to go down the waterway in between the golf club and the eastmost island. Stay on the right to avoid running aground. Keep going but take the last few turns slowly and you should win.

Once you get to the yacht, Lance will drive you back while you sit shooting at the pursuing gangsters. Concentrate on blowing up the boats rather than the men on them. When you see the chopper spray it until it runs off then turn round to take out the boat in front.

Reward \$10,000. Kent Paul should give you a call afterwards, unlocking his missions.

17. RUB OUT...

The last mission marked with Diaz's D can be found just after coming off the bridge from Washington Beach. It becomes unlocked after completing Death Row. Lance will appear and give you a gun. Make your way to the main entrance of the mansion, shooting anything that moves inside the grounds. The front door is locked so head round the eastern side of the building. When you get round the corner Lance will start sprinting ahead so it's up to you to keep him healthy. He will lead you to a back entrance.

Inside Diaz's Mansion you should make your way to the top floor by going all the way up the stairs. Stop at each landing and use a light machine gun to auto-target any bad guys above you that you can't see. At the top go through the corridor to the main staircase where Diaz will appear. Shoot him until he runs into his office then follow him and shoot him until he dies. Reward \$50,000 and the mansion as a new hideout.

VERCETTI MANSION

This used to be called the Coke Baron's Mansion. Now it belongs to you. Cool.

18. SHAKEDOWN

All of these missions are unlocked after you've completed Rub Out... Jump in one of the cars outside and speed up towards Vice Point. Go inside the North Point Mall. Once inside you have to smash all the glass in the indicated shops. Start by the east entrance and do the two windows to the left. After this go round and do the windows of Gash. This will get you two stars. After smashing the glass upstairs there's a handy set of spare clothes by the upper door. Run round the upper balcony to the next shop and smash its windows.

The cops will be on to you so sprint round to the escalators and go down. Smash the closest windows (there's health in a booth in the middle of the floor nearby) then run over and do the last two. Reward \$2000. Finishing this mission lets you buy some of the properties around town that were previously locked.

19. BAR BRAWL

You get some buddies to help you on this one. Get in a car and head over to the Ocean Beach area. Do a drive-by on the two men outside the bar then go in and talk to the owner. Afterwards get in a car and speed north. Don't worry if one of your friends gets left behind. Park your car by the entrance and slaughter the men inside. Two of them will escape on bikes so get in a car and follow them. Knock one off their bike and squash them. Follow the blip to the second and execute him. Reward \$4000.

20. COP LAND

Get in a car with Lance and drive towards the pink blip on the radar. Park near the open double garage. Commit a few crimes to get a Wanted level. Lure a couple of police officers into the garage and the door will shut. When it opens, you and Lance will be dressed in disguise.

In the yard behind the garage is an empty cop car. Drive to the North Point Mall and enter via the southeastern corner door. Go in and step on the marker. As soon as the timer starts, go out the same door you entered by and get back in the cop car. After the explosion you will get a four-star wanted level.

Drive back to Vercetti Mansion at full speed. You will be chased all the way by the police, FBI and helicopters. Your police car will not last very long so when you reach a roadblock ditch it and get in the police van. Drive back to your mansion. Reward \$10,000. This completes a sub quest. Money will now appear outside your mansion on a regular basis.

KENT PAUL
Geezer Kent Paul hangs out inside the Malibu Club.

21. DEATH ROW

Before attempting this mission pick up some armour. Get in the first vehicle you find outside and head south. Aim to cross the bridge connecting Starfish Island and speed over to Little Haiti. Make your way to the entrance of City Scrap. Drive your car into the vehicle blocking the entrance and try to take out a few thugs on the way. Get out of the car with an Uzi equipped and kill all the gangsters nearby using the auto-target.

Make your way through the yard, stopping every few meters to shoot some bad guys. Lance is in a hanger marked on the radar. Once he's free get in the vehicle next door. You now have to Lance to the hospital in Downtown. There's no time limit so do not be afraid to take massive detours if it helps avoid getting smashed up by your pursuers.

If you can get on the main road running up the east side of the island, you can easily outpace the competition and get to the hospital with little effort. Reward \$10,000. Soon after this mission Cortez will get in touch with more missions. This also unlocks a Diaz mission.

22. PRINT WORKS

Spilling the Beans: These missions become available after you purchase the Print Works hideout. Get in the cab outside. Enter the Malibu. After the cutscene drive down to Vice Port and get on the large ship on the east side of the docks. Shoot your way to the front of the ship and climb the stairs to the marked area. Escape from the boat and use the Linerunner opposite the off ramp to get back to the Print works. Reward \$2000.

23. HIT THE COURIER

Drive down to the docks and head for the blip. Approach cautiously because all the nice-looking ladies are armed to the teeth and will kill you before you can blink. Stand by the gate and shoot them one at a time. The bulletproofed courier will crash. Step back while keeping the ladies pinned down. After a few explosions sprint towards the arrow and collect the Plates, then get in the nearest vehicle and rush back to the Print Works. Reward \$4000. The Print Works will now generate cash for you to collect.

CHEATS

Enter any of the following cheats during gameplay. If you enter a code correctly, a message will flash in the top right corner of the screen.

The vehicle cheats will not always produce a vehicle if you are standing in crowded areas. One place that definitely works is standing on the road outside from the Ocean View Hotel. When you are inputting a cheat be careful not to be holding onto any highly dangerous weapons, as the fire button will need to be pressed in some of the codes. Also, some of the cheats can seriously spoil your game so do not save after inputting them.

If you play around with the cheats, re-set your PS2 before continuing with your game.

KINGDOM HEARTS

POSTCARDS

Traverse Town has 10 hidden postcards. If you find one and post it into the mailbox in the

first district, you will get a reward. The more cards you send the better things you will get, so by the time you've posted the last few cards you will receive rare items like Defense Up and Power Up - well worth the small effort it takes to collect the cards.

- In the Item Shop. Jump in the air and swipe the fan on the ceiling until it starts turning<None>

- On top of the Accessory Shop. It's easier to reach after you obtain the High Jump ability

- In the 2nd District is a shop called Boots and Shoes. The postcard is above the shop front
- Locate the Blue Trinity mark near the Item Shop to get the next Postcard
- After joining up with Donald and Goofy you can

open the safe behind the Accessory Shop to get another Postcard

- Use Thunder magic on the exposed wires in the 3rd District to activate the Gizmo Shop. Stand on three buttons in the Gizmo Shop, then check the clock thing inside for two Postcards

- Kill Guard Armour (second time), then jump over the rooftops in the 2nd District and enter the 3rd District via the upper window. Search the balcony

- Open the other shop above the Accessory Shop and search the walls to get another Postcard

- On a shelf in Gepetto's house in the 1st District. This will not be open until late in the game

TORN PAGES

Scattered throughout the land are Torn Pages. These are needed if you are to complete one of the game's side quests. When you find a Torn Page go to the Mystical House and examine Merlin's book. Once inside the book you can visit different areas. New areas can only be entered when you have completed one area and have a Torn Page.

- Traverse Town. Rescue more than 51 Dalmatians and talk to the older dogs in the house

- Agrabah. Inside the Dark Chamber in the Cave of Wonders
- Monstro. This one's inside Chamber 6
- Halloween Town. Search the bookcase in the Doctor's Lab
- Atlantica. Inside Ariel's Grotto, up high

SUMMON GEMS

You need these to get Summon monsters to help you fight battles. They're pretty useless most of the time but they look great. Once you get a summon gem, return it to the Fairy Godmother in the Mystical house and she will unlock it for you.

- Earth Shine: Turns into Simba. You can get this from Leon in the Secret Waterway in Traverse Town

- Watergem: Turns into Dumbo. Find it in Monstro's Mouth
- Naturespark: Turns into Bambi. Start doing the Winnie The Pooh side quest (Merlin's Book) and a Torn Page will turn into this
- Fireglow: Turns into Mushu. Beat the dragon in Hollow Bastion
- Genie will join you after you finish Agrabah
- Tinkerbell will join you after you finish Neverland

THE MISSING DALMATIANS

Scattered throughout the game are 99 Dalmatians. You will find some as you go but for the rest consult your journal to find which numbers are missing then have a look at this handy list to locate the remaining pups. You will have to revisit some areas when you learn new skills to get hold of previously unreachable doggies. The more pups you rescue, the more rewards you will

receive from the Dalmatians House in Traverse Town.

● Make Aladdin call to one of these blocks

● 97-98-99: High Tower. Use Gravira on the floating chest outside the Lift Stop room when you pass through that room near the top without taking a lift

● Point your Gravira spell at the floating chest to bring them down

Don't fall off, it's a long way back from the bottom

● If you get killed too quickly, you probably need to go away and level up

BOSSSES

Once you get past the first couple of worlds the game will turn into an endless round of boss fights, some of which are easy, some hard and some just plain infuriating. Always make sure that your party is stocked up on potions and has the best weapons. At first you will rely on Donald and Goofy to heal you but when you reach later bosses it would be wiser to look after yourself. If you find that a particular boss is too difficult, leave that area and go somewhere else to fight some easier enemies and gain a few more levels. Following is a selection of some of the hardest fights in the game, but if you get stuck on one that we have not covered, write to the usual address.

● It's nice when your mates heal you but when they don't you will want to pull your hair out in rage

CLAYTON AND THE CHAMELEON

This fight will be easier if you have Tarzan in your party instead of Donald, as he can hold more potions and do more damage. Clayton is not actually floating in midair but is riding on a great big invisible lizard. You should concentrate all your attacks on the area underneath Clayton to reveal the Chameleon.

Use jumping attack combos and eventually Clayton will fall off and the lizard will become visible. At this point you should ignore Clayton and concentrate on finishing off the lizard. Keep bashing it until it falls over with stars around its head. Once that's done, lock on to Clayton and start beating him. When he gets onto a high ledge use some magic on him. Then, when you can all easily reach him, go in and start pounding away.

He will try to heal himself but as long as the whole party is hacking him, you should eventually be able to defeat him.

CERBERUS

Cerberus is massive and hard. His attacks are also on the large side and can be hard to avoid. All three of his heads can be targeted but you should lock onto one of the side heads and concentrate on that. Stay to the side of your chosen head and do jumping combos. As long as you stay to the side, you should avoid his nasty chomping attack but you will need to move to stay out of his path when he starts stamping. Keep attacking in between these attacks. At some point Cerberus will spit out dark liquid. As soon as he does, start rolling around like crazy to avoid severe damage. When he stops continue to roll around, as he will probably start chucking fireballs around. Once he's done you can move in and attack again. His health bar is big so this fight will take a long time but if you repeat this process and keep yourself healthy, it should not be too much of a problem.

● Target a side head and concentrate on this one for the rest of the fight

THE TIGER'S HEAD

This fight is really frustrating and can take a very long time. The only weakness is the eyes but these are too high to attack most of the time, so you are going to have to get on its head and stand on its nose. This is very tricky when the head is bouncing around, you're being hit by fireballs and the camera is being a pain. Most of the time you will struggle to get onto its head and you'll probably manage to hit it once before you fall off. So for every hit you get in, you will probably fall

off about a dozen times. You could wait for the odd moments when the tiger's head dips down to attack its eyes but if you are waiting around on the

ground, you are likely to be being pulverised by fireballs and spawning heartless. Instead you should try to run up the ruffle on its neck or wait for the head to tilt and run over the back of the neck. If you reach the top, it's worth trying to stand still for a few moments and move the camera to where it's most useful before carefully stepping onto its face to attack the eyes. Luckily its attacks are not too devastating so you are unlikely to die unless you are careless; it's just a matter of time.

● You need to stand on its face and attack the eyes. Concentrate on one at a time

URSULA

Ursula is probably the hardest fight in the game. Make sure you are stocked up on items before entering and have Donald and Ariel in your party, as magic will play a big part. You should take some Ethers with you but when you run out of MPs you will need to spend a bit of time beating up Eels to regain some magic. Keep your eye on Ursula and her cauldron. You need to attack her cauldron to cause any damage and you need to use magic to do it. When she drops an item in, it will change colour. If it turns red, you should quickly lock onto it and cast two fire spells at it. If it turns bright blue, cast Blizzard on it twice. (When nothing's going on it stays a blue colour; casting any spells on it will just be wasting MP's which is why you should watch Ursula.)

If you get two spells off before Ursula finishes hers, it will backfire on her and make her dizzy for a while, at which point you need to find her and start whacking her. Repeat this process until she runs away. The second time you fight Ursula is also very hard. She will use a lot of magic, so equip your characters with stuff that reduces magic damage. You need to get in close and attack her head. Unfortunately she will try to turn and meet you, meaning you will nearly always end up in front of her mouth where you can get killed very quickly. Stay to the side or get behind her and hack away. You should also be healing a lot, as most of her attacks are unavoidable. Your best bet is to be super-aggressive and try to finish her off before you run out of healing items.

● Attack the cauldron with a matching colour spell after she throws in an item

● The second fight is almost out of your control but try to stay away from the huger mouth

OOGIE BOOGIE

Before you go in equip Sora with as few Ethers as you'll get through his MP bar in no time. Once the fight starts, move around and lock on to Oogie. Stand back and use Fira on him. Keep doing this until you see the symbols in the middle of the area glow. Keep your eye on where Oogie is and stand on the symbol directly in front of him. If you picked the correct one, that section should close off and rise up. Now all you need to do is jump up and attack with normal blows until you get knocked back down.

When you run out of MP and Ethers, you will just have to spend time and energy killing heartless to regain MPs. If all else fails, keep running around the area with your eye on Oogie and when the symbols start to glow try to stand on the one nearest to him. Once you've killed him, Oogie will turn into a giant house. Start at the bottom and destroy the six dark orbs around the body. That's it.

● When the buttons in the middle glow stand on the one closest to Oogie to get near him

SQUALL AND YUFFIE

This is one of the hardest fights in the game. To make it very slightly easier do not take on the Pegasus cup until after you have beaten all the availed worlds first. You will want to make sure that your party is equipped with the best weapons, accessories and items that you can get. Once the fight starts, you should concentrate on Yuffie. It's almost impossible to avoid her ninja stars so don't bother. Instead you should hit them back at her. When she lobbs one, press the attack button and if the timing is right Sora will knock the star back at Yuffie, causing her damage. Use the roll move to get close to her and start beating her with the Key blade. Once she's down, beating Squall will be much easier without the constant healing he would otherwise receive from Yuffie. Simply run in and bash him. When he powers up his sword you will need to run in and attack and then retreat before he whacks you. Repeat this process, keep your health above the halfway mark and it will soon be over.

● Once you get the hang of hitting her ninja stars back at her, this fight will be easy

MALEFICIENT

The first encounter with her is a piece of cake. Just get on her platform and hack away. If she goes high, beat the underside of her ride until she comes back down, then proceed to smack her some more. Let your party deal with her pets and concentrate all your whacking power on the old witch. The only attack of hers you need to watch out for is when she rains down meteors. If you see this charging up, spend a few moments rolling around and dodging.

When she dies follow her into the void where she turns into a dragon. Cast Aero on yourself (keep it on for the duration) and run in. Get close and again start hacking away by locking onto the head. Heal whenever your health gets down to about halfway and continue to bash the beast. She has a few health bars but these go down quickly enough.

● Stand next to her, attack continuously and watch her health disappear
